# Process-Mining-Chrome-Extension
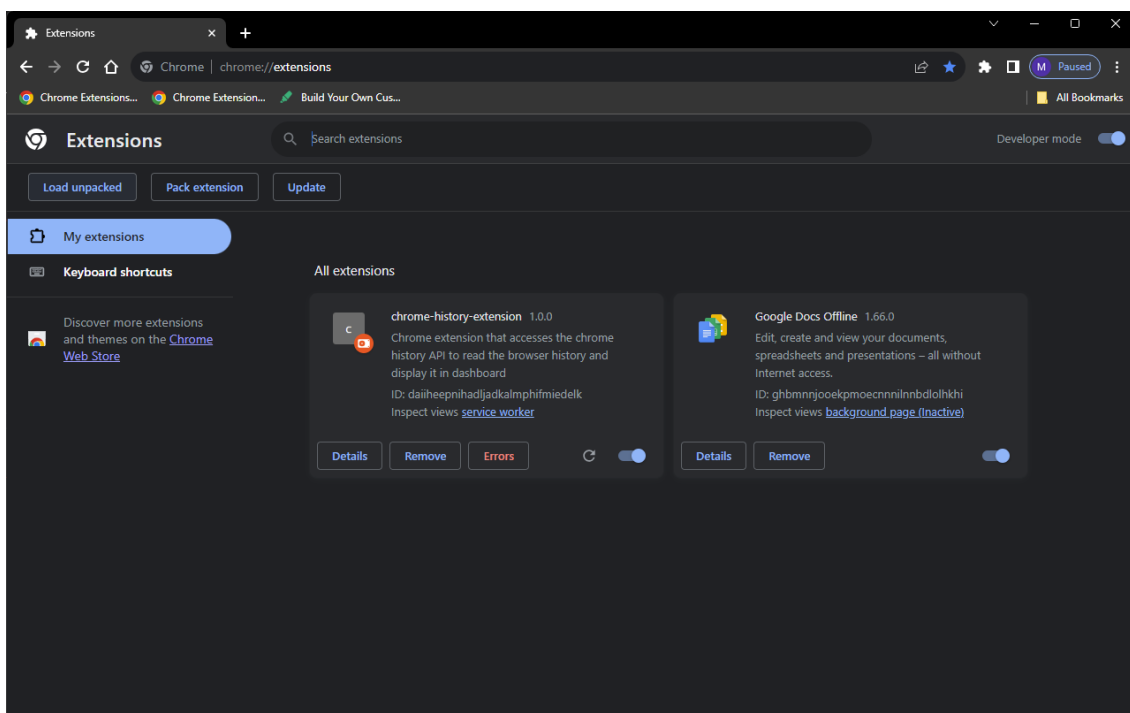

Launching the application

Extension

1. Run Google Chrome browser.

2. Hover over the 'Extensions' option in the browser's context menu.

3. Choose the 'Manage Extensions' option.

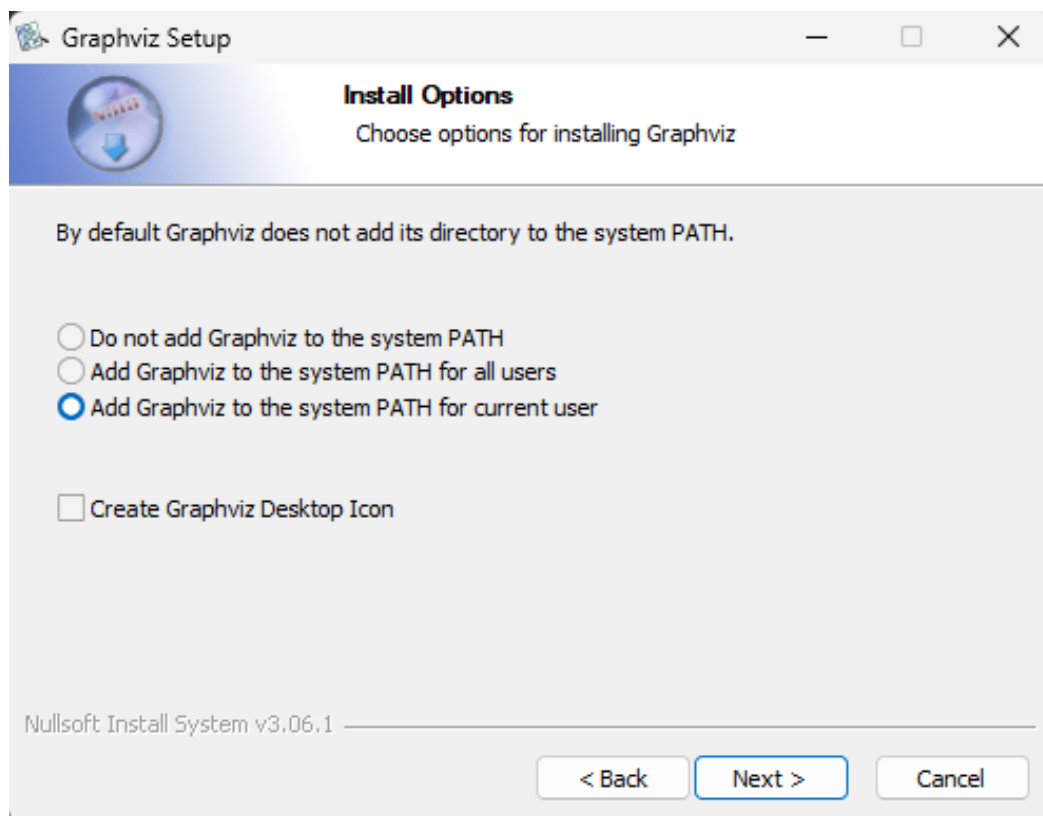

4. Click the 'Load Unpacked' button.

5. From the dialog window choose the Extension folder.

Server

1. Install Graphviz 9.0.0 from: https://graphviz.org/download/source/

2. During the installation choose the 'Add Garphviz to the system PATH for current user' option.

3. Open console in the Backend folder.

4. Install required libraries using the command: pip install -r requirements.txt --user

5. Run the server using the command: python .\controller.py
